

Jessica Wenig, 9

“My dad gets  
people to the top  
of skyscrapers.”

Jessica's father and his colleagues ensure the smooth operation of all the elevators and technical facilities in Europe's tallest office building.

Leading-edge technology that moves you.

Stefan Wenig and his colleagues are responsible for ensuring that over 2,400 Commerzbank employees reach their workplace safely, comfortably and quickly each day. 30 elevators transport them at a speed of six meters per second to every floor of the almost 300 meter tall tower. As well as building the elevators, ThyssenKrupp also looks after facility management, maintenance and repairs in Europe's tallest office building.

The expertise behind elevators and services like these is in demand all over the world, which is another reason why ThyssenKrupp is such an attractive investment.
