

Facts and figures about the ThyssenKrupp Quarter

Size

The ThyssenKrupp Quarter site measures 17 hectares.

Construction site

- More than 300 companies involved in the building work
- More than 1,600 workers on the site
- 450,000 m³ of earth moved
- Up to 12 meters depth of excavation
- 50,000 m² of foundations uncovered
- Around 3,000 meters of site fencing
- 17 cranes (of which 13 in use at the same time)
- Several hundred site vehicles per day

Materials for the buildings

- 400,000 solar control slats made of ThyssenKrupp stainless steel
- 320,000 meters of wiring (excluding IT)
- Approx. 9,000 meters of water pipes
- 23,000 tons of steel
- 90,000 m³ of concrete
- Approx. 16,000 m² of glazing
- Approx. 30,000 m² of carpeting
- Approx. 10,000 m² of parquet flooring

Grounds

- 75,000 m² of green space

- Water basin 235 x 30 meters, water depth 0.15 m
- “Avenue of the worlds” being built along the water basin: 68 trees from five continents (15 different tree types)
