thyssenkrupp completes sale of Infrastructure business to FMC Beteiligungs KG

With today's closing thyssenkrupp completes the disposal of its Infrastructure business. At the beginning of August, the thyssenkrupp group announced the sale of the Infrastructure business unit to FMC Beteiligungs KG, thus successfully implementing a further step in the focusing of the portfolio as part of the initiated realignment. FMC, an entrepreneur-led, independent German investment company, makes long-term investments in companies with a focus on sustainable value enhancement for the benefit of employees and society. Both parties have agreed not to disclose the financial details of the transaction.

Following receipt of all merger control clearances, the transaction was formally closed today. The Infrastructure business will benefit from the new owner's strategic concept for the gradual further development of the company. This includes in particular necessary investments in digitization and the development of existing and new markets.
